

Fall 2008 Competition.

Operating Grants in the Areas of:

- 1) **Blood Utilization and Conservation Research**
- 2) **Blood Supply Risk**
- 3) **Transfusion Related Acute Lung Injury (TRALI)**

Results from the collaborative initiative between Canadian Blood Services, Canadian Institutes of Health Research, and the CIHR Institute of Circulatory and Respiratory Health

Applications were received for these initiatives as part of the September 2008 Operating Grants competition. Applications were peer reviewed by the most appropriate peer review committee of CIHR and were reviewed in competition with all other applications considered by peer review committees.

Two applications were received for consideration for the **Transfusion Related Acute Lung Injury (TRALI)** of which one was approved for funding.

Transfusion Related Acute Lung Injury (TRALI)				
Principal Investigator	Research Institute	Title	Funding Source	Average Annual Operating Amount
SEMPLE, John	St. Michael's Hospital Toronto	Understanding the immunopathogenesis of Transfusion Related Acute Lung Injury (TRALI)	CBS	\$122,305

Four applications were received for consideration in the area of **Blood Utilization and Conservation** of which none were approved for funding.

Four applications were received for consideration in the area of **Blood Supply Risk** of which none were approved for funding.
