June 23, 2009

Subject: New 2000 IU vial size and NIPRO Safe Touch PSV 25 gauge butterfly for Helixate® FS

Dear Health Care Professional,

CSL Behring is very pleased to announce two new additions to the Helixate® FS (Antihemophilic Factor [Recombinant]) family, currently available in 250, 500 and 1000 IU sizes, to be reconstituted with the supplied 2.5 mL Sterile Water For Injection (SWFI), USP. Helixate FS® will now be available in a 2000 IU format offering greater dosing convenience for patients requiring higher doses of Helixate FS®. This new format is to be reconstituted with the new supplied 5 mL SWFI, USP. The new Helixate® FS 2000 IU size will be available from Canadian Blood Services in July 2009. Furthermore, all supplied SWFI, USP for Helixate® FS will now come from CSL Behring's own production site in Marburg.

At the same time we are pleased to announce that Helixate® FS will also now include the NIPRO Safe Touch PSV 25 gauge butterfly for further added patient convenience. The NIPRO Safe Touch PSV will be included in a new package format of all Helixate® FS sizes, and will be introduced at the same time as the new 2000 IU format in July 2009.

For further information on Helixate FS® 2000 IU, the NIPRO Safe Touch PSV 25 gauge butterfly or a copy of the product monograph for Helixate® FS, please contact us toll free at 1-866-773-7721 or visit our website at www.cslbehring.ca

Sincerely,

Joseph Andolfatto
