Customer Letter #2010-25

2010-07-19

Dear Customer:

Please find enclosed a Dear Customer letter from Cangene Corporation dated July 15, 2010.

Cangene Corporation has advised Canadian Blood Services that there is a temporary shortage of WinRho[®] SDF 1500 IU (300 ug) and WinRho[®] SDF 600 IU (120 ug) in the liquid formulation. WinRho[®] SDF will remain available but in the **lyophilized formulation (freeze dried concentrate)**.

Presently, Canadian Blood Services has only very small quantities of WinRho[®] SDF 600 IU (120 ug) in liquid formulation available and will continue to distribute until the stock has been depleted. WinRho[®] SDF 600 IU (120 ug) freeze dried concentrate will be available for distribution in mid July 2010.

Current Canadian Blood Services inventory of WinRho[®] SDF 1500 (300 ug) in the liquid formulation is expected to meet demand until approximately mid August 2010. Once this inventory is depleted Canadian Blood Services will commence distribution of the lyophilized formulation.

WinRho[®] SDF 5000 (1000 ug) will continue to be available in the liquid formulation.

Ordering

The existing CBS codes on the Plasma Protein Order Form remain the same for all WinRho[®] SDF formats.

If you have questions regarding WinRho[®] SDF please contact Cangene's bilingual customer service department at 1-877-226-4363.

This Customer Letter and the enclosures can also be viewed at www.blood.ca in the "Hospitals" section.

If you have questions about this Customer Letter, please contact Canadian Blood Services Plasma Products and Services Department at 613-739-2392.

Sincerely,

Ian Mumford, Chief Operating Officer

Encl.
