Hi Chantal,

Re: Batch Numbering System for Kogenate® FS

Bayer Inc.
77 Belfield Road
Toronto, ON M9W 1G6

Tel. (416) 248-0771
Fax (416) 240-5477

The lot numbers are generated by the SAP batch number system. This system generates unique batch numbers based on the following criteria:

- The batch number consists of the 2-digit coded prefix and 5 variable characters
- For Kogenate® FS the prefix is: 27
- Characters used in the variable part of the prefix are:
0,1,2,3,4,5,6,7,8,9, C,G,H,J,K,L,N,P,R,T, V,W,X
- Prohibited Alpha Characters are: A,B,D,E,F,I,M,O,Q,S,U,Y,Z

Batch numbers reserved for manual assignment with the SAP R/3 system are those with N or P in the third position from the Left. The full range of the manual block of numbers is: 27N0000 to 27PXXXX. Examples are 27N0028, 27P40C1.

We trust you will find this in order. Should you require further information, please do not hesitate to contact us at (416) 240-5487.

Sincerely,

Anthony Gentile
Manager Quality Assurance
